Oliver X: Talk about the work Amplified does in the community and how you select your projects and campaigns.

Kenneth Allen: Throughout the last few years Amplified has AMP’d up it’s focus on our community because there are so many organizations and individuals in need. We realize that we are blessed to be in business for so many years and we owe it to our wonderful community to continue to give back! It’s fully reciprocated in so many ways and we’re just so fortunate to be in the position to be able to help so many people. We are NOTHING without our community!

Many of our current projects are now approved by our new Community First Coordinator “Hanilet Barroga” who reached out to us after seeing our heavy involvement in the community.
